SAMAY TRACK 2W

Your bike. Every samay. Everywhere.

The **4G LTE-M GPS + NavIC tracker** built for Indian motorcycles and scooters. Live location, theft alerts, crash SOS and remote engine lock in one palm-sized box.

हर पल, आपकी गाड़ी के साथ।

10 s	~2 m	40 h	12 / 24 V	∞ km
live location updates	accuracy, open sky*	tracking after power cut	9–36 V, bikes to e-rickshaws	range: anywhere on 4G-IoT

Everything a rider needs

CORE FEATURES

Live tracking
See the bike move on your phone, plus trip history, speed and distance.

Theft alert
Someone pushes, lifts or tows your parked bike? You know in seconds.

Remote engine lock
Stop a thief from starting the bike with one tap in the app.

SOS panic button
One press sends position and alarm to family or the control room.

Geofence
Draw safe zones. Get an alert when the bike enters or leaves them.

Crash detection
Detects a fall or impact and alerts automatically with location.

HIDDEN POWERS

What others don't tell you

Built in. No extra cost.

Black-box memory
Stores 4 lakh points with no network, then fills the gaps when signal returns.

Secret backup battery
Cut the wire? It keeps tracking for about 40 hours and tells you who cut it, and when.

Tamper timestamp
Opening the box is logged by its own clock, even when it is asleep.

Battery guardian
Sleeps at 0.11 mA and warns you before the bike battery gets too weak to start.

Indestructible input
Survives reversed wiring, jump-starts and 36 V spikes.

City-canyon accuracy
The L5 band and India's NavIC cut the drift near tall buildings and trees.

Gets smarter over the air
New features arrive via secure OTA updates, with automatic rollback.

Safe-stop logic
Engine lock only engages at standstill or low speed, never at speed.

Simple pricing

INDICATIVE LAUNCH PRICES

FLEET · AIS-140

₹7,499 /unit

25+ vehicles · rentals, delivery, taxi-bikes

- NavIC + SOS + tamper for AIS-140
